ANDROID EXPERT & TRAINER

EXCELLENCE IS A GOAL, NOT A STATE.

JOB PROFILE : 6 YEARS ON ANDROID.

ANDROID EXPERT	Android expert: Author of 3 ebooks on Android (in french and english), of articles on developepez.com (6000 views per month); of articles on android2ee.com (1000 view per month), recognized as an Android speaker, 137 stars on github's project ...
ANDROID SPEAKER	2016: DevoxxFr 2016 (3h about <i>Architecture Android et bonnes pratiques</i>) 2015: DroidCon London , DroidCon Paris , DroidCon Greece 2015 2014: DroidCon London 2014 2013 : DroidCon Paris 2013 2012: Devoxx France 2012 (3H about Android programming). 2012: Eclipse Day Toulouse, 24/05/2012, conference. 2012: JCertif Africa 2012 (The Java conference of the African continent) September 2012 2012/2013/2014/2015 many conferences ToulouseJUG / ToulouseAUG / ParisAUG /LyAug
ANDROID TRAINER	I offer Android trainings, constantly updated and improved : " Formation Complète Android " (Android The complete training), " J'assimile Android " (I Assimilate Android), " Android Ultimate " (Android Ultimate) and " Android Master " (Android Master). For more information : Comment choisir sa formation Android2ee ?(How to choose your training) (+ than 200 trainees and close to 95% satisfaction)

REASON FOR APPLYING

Why being a GDE on Android?

There are several reasons. The main one is to make my work recognized by Android's community. I invested a lot in Android during the last 5 years, I built a company dedicated to Android, to be sure to work only on Android, the way I think I have to. My goal was to understand that technology and to explain it to others; that's why I choose to set my business model as a Training Company which only gives Android trainings. I have trained more than 200 people (in more than 100 companies), explaining them the good practices on Android not only how system components works.

My goal is to explain to people how to build consistent, system and battery respectful, responsive, asynchronous and smooth applications.

I am proud of my trainees, for example, the [FNAC](#) and the [AirFrance](#) applications have been done by them. But there is a lot of others examples of their work.

In parallel, I have done conferences to broadcast the good practices in the french GDG (Paris, Toulouse, Lyon), at some DroidCon (London, Paris and Thessaloniki) and I spent one week in Brazzaville giving free Android course for the JCertif. I am also writing articles and blog posts to explain how android works. I will list all those elements below. I have also made GitHub projects to help the community.

How I hope to use that GDE status?

By the way, I hope it will be easiest to be selected at the CFP of some big conferences as a GDE, I would like to talk at all the European DroidCons. I have a lot to explain on how to build good application, especially in the Architecture Area, but the GUI area (Animations, Custom Views...) is also my topic. For the moment, I focus on London, Paris and Thessaloniki. I hope to go to Italy, Spain, Netherlands and Germany DroidCon in the next years.

For the next year, I also want to translate my conference "Architecture and good practices" [Devoxx 2016] in english (so I need to make it in English and drop it on youtube). I also want to film my course and drop them on Youtube too (something like 40 hours of talk with associated workshops on github). I wait to move my office to launch those actions (in July), because I will have a room to record conferences in the new one.

So being a GDE, help to be more recognized by the community and then enhance in a global way the knowledge of the community.

But I think, my main goal is to reach more people with my content (conferences, articles ...).

Another elements of being GDE would be:

- Find a startup to work with to build a perfect application (because French government has made a new law on Training Company and the consequences of that law is a disaster for my company, more information : <https://medium.com/@android2ee/le-jour-o%C3%B9-les-informaticiens-nont-plus-eu-droit-%C3%A0-la-formation-professionnelle-f2a32f4f82dc#.28gqjewrc>),
- Have more trainees,
- Be invited at GoogleIo and Android DevSummit,
- Open new opportunities I don't even know they exist :)

RELATIONSHIP WITH GOOGLE

As I never built a 1M users applications, I haven't been invited by the google teams to work with them. It's not my business model. By the way, after going several times to DroidCon I finished to know some googlers.

Damien Mabin, we met this year at DroidCon Greece and have great discussions together.

Alexis Moussine-Pouchkine and *Martin Gerner*, we met at the DevoxxFR.

This year (2015) I was invited to the "Fragmentation and Android workshop" in London and I met *Wilson L. White* and *Tim Hwang* there.

I talked several times with *Chet Haase* (it was at the droidcon London) and he came at my conference "Animate me, if you don't do it for me do it for chet". You can ask him what he had thought about it (I did, but you're are so political correct at Google sometimes, that I don't know if the answer was his thoughts).

By the way, I don't only knows Googlers:

Pierre Yves Ricaud (Square), *Eyal Lezmy* (GenyMotion / GDE), *Xavier Hallade* (Intel / GDE) and *Cyril Mottier* (CaptainTrain / GDE) are people with I usually talk at the DroidCon (or others conferences). And we have finished to know each other's.

As I did an amazing conference at the DevoxxFr 2016, I also sent an email to *Romain Guy* and *Nicolas Roar*, for them to watch it (it's the only guys I know at google who talk French). I met them at the DevoxxFr 2012. I am not sure they did it especially with the google io around and I am not even sure they remember me (I met them at the DevoxxFr 2012).

ACTIVITY DETAILS

CONFERENCES

I gave 19 conferences in GDG, DroidCon, Eclipse Day or Devoxx in 4 years.

The associated videos has been watched **4664 times** and the supports on slideshare have been read **31655 times**.

GITHUB PROJECTS

I have **150 stars** on my project (only Android projects).

AnimatedVectorMorphingTool

<https://github.com/MathiasSeguy-Android2EE/AnimatedVectorMorphingTool>

This project allows you to simply animated your VectorDrawables. You just drop your VectorDrawables files (you can drop as many as you want), run the AnimatedVectorTool (command line tool), it generates the files for you. You copy paste those files in your res folder (main folder to be exact) and run your project. And it's done !

66 Stars

Associated with the conference "*Animate Me, if you don't do it for me do it for Chet*"

GDirectionsApiUtils

<https://github.com/MathiasSeguy-Android2EE/GDirectionsApiUtils>

This project aims to simplify the usage of the Google Map Direction Rest Api

42 Stars

Associated with nothing

Animation

<https://github.com/MathiasSeguy-Android2EE/Animation>

This project is the support for the DroidCon Gr 2015 conference I gave about animation

10 Stars

Associated with the conference "*Animate Me, if you don't do it for me do it for Chet*"

MythicServiceHelper

<https://github.com/MathiasSeguy-Android2EE/MythicServiceHelper>

This project aims to publish the ServiceHelper on Android. This ServiceHelper has been declared existing in the "Android REST client architecture" at the GoogleIO 2010 by Virgil Dobjanschi. But in fact, it didn't exist, so I create it.

8 Stars

Associated with nothing

ForecastYahooRest

<https://github.com/MathiasSeguy-Android2EE/ForecastYahooRest>

This project aims to show what architecture you should set when requesting a Rest service.

6 Stars

Associated with the conferences "An Android Journey" and "Architecture Android et bonnes pratiques"

BlueToothTuto

<https://github.com/MathiasSeguy-Android2EE/BlueToothTuto>

This code is a tutoiral to explain how to set bluetooth communication between two android devices.

5 Stars

Associated with nothing

SignInWithGoogleTutorial

<https://github.com/MathiasSeguy-Android2EE/SignInWithGoogleTutorial>

SignInWithGoogle Tutorial is the dedicated to explain how to use the Google SignIn pattern within your Android Application

4 Stars

Associated with the conference "Google Authentication"

ToolBar4Github

<https://github.com/MathiasSeguy-Android2EE/ToolBar4Github>

This project (under AndroidStudio) explains how to use the "new" ToolBar

2 Stars

Associated with the conference "ActionBar Compat"

Square

<https://github.com/MathiasSeguy-Android2EE/Square>

This project explains how to use Square libraries on Android : OkHttp, OkIo, Moshi and Retrofit

1 Stars

Associated with the article "Retrofit, Okio, OkHttp et Moshi"

EBooks

I sold more than **2000 EBooks** on Android programing.

The price is around 10€, that way every student can buy it. I wrote them in 2011.

I will make them freely downloadable soon. For now, all the french chapters can be downloaded in a freeway here: <http://www.android2ee.com/site/Livre-en-consultation/> .

ARTICLES ON ANDROID2EE

Android2ee is my own web site.

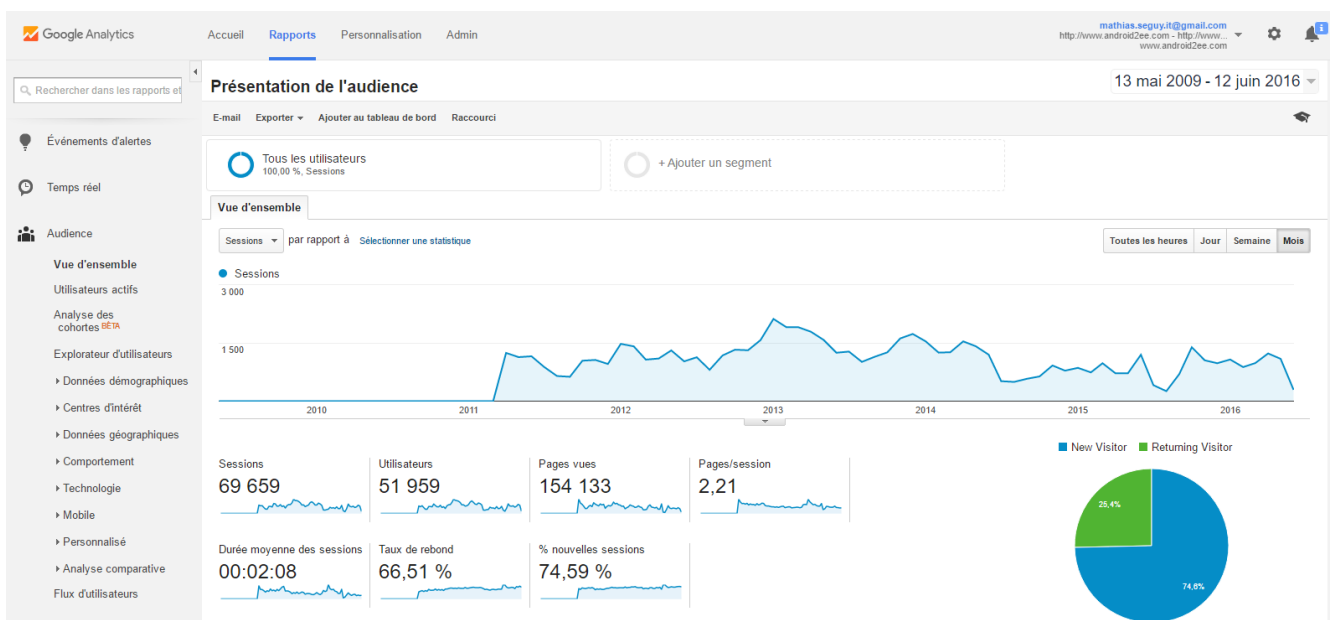

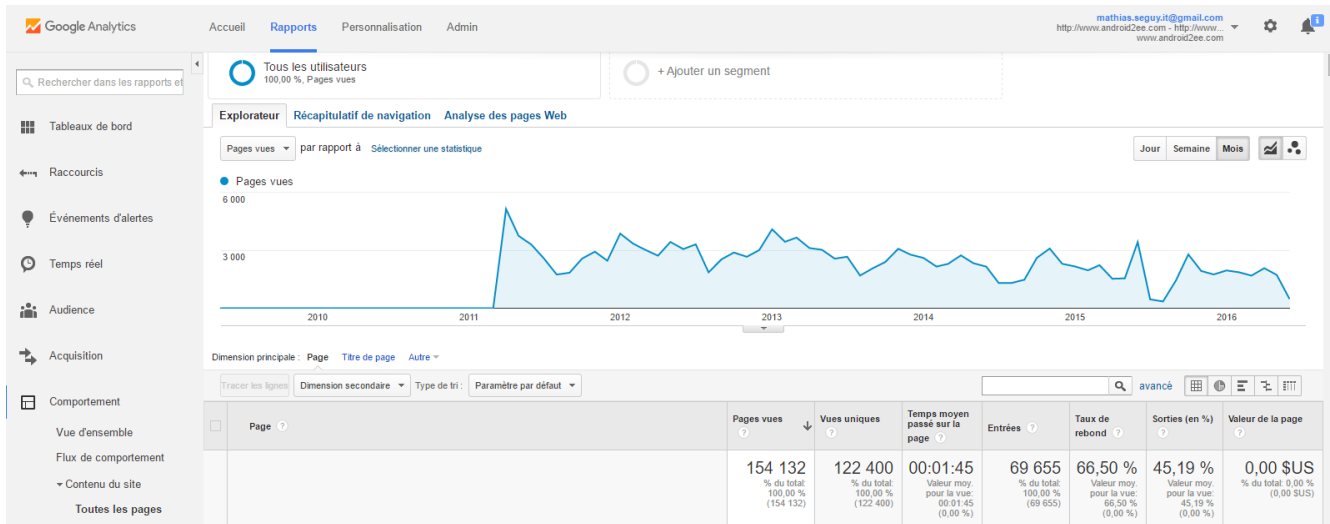

There is a lot of Android resources on it (in french, the english version of the site is "building"), you can find there:

- The videos of the conference
- The presentations note (slides)
- The tutorials
- The EBooks
- All the chapters of the EBooks that can be downloaded freely
- The articles
- My blog
- The presentations of my training

I won't show you a details picture of the statistics but the whole vision.

We can sum up:

- **51 959 Users**
- **69 659 Session**
- **154 133 page views**

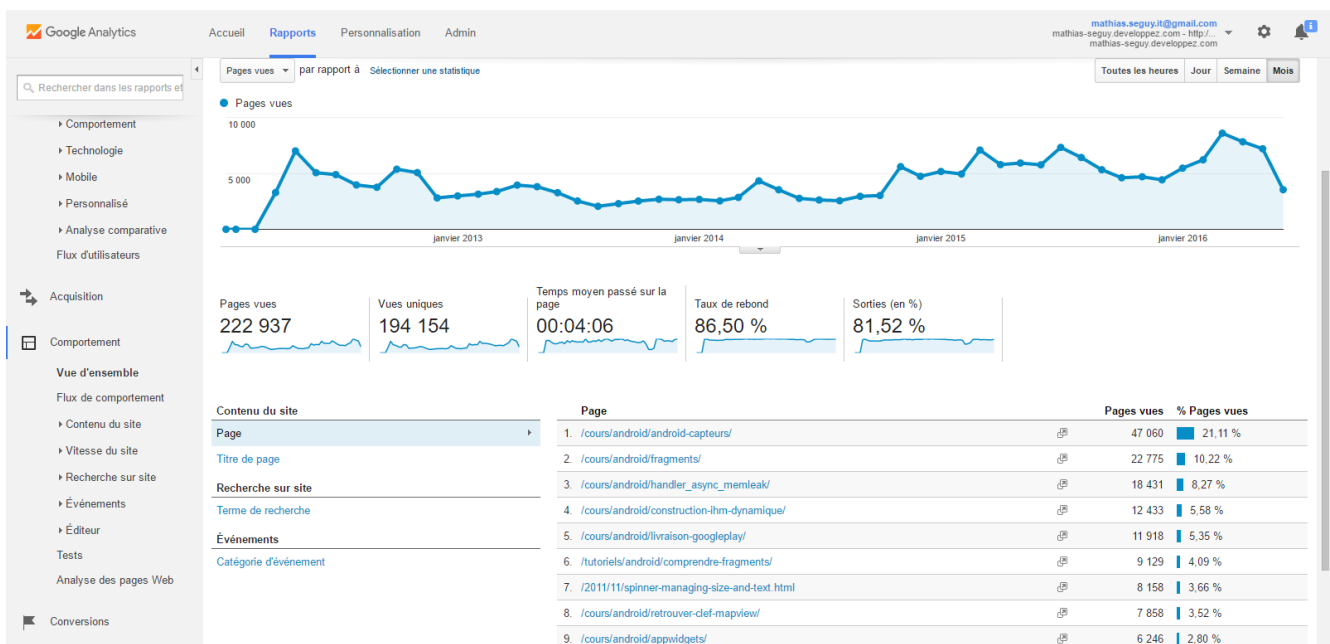

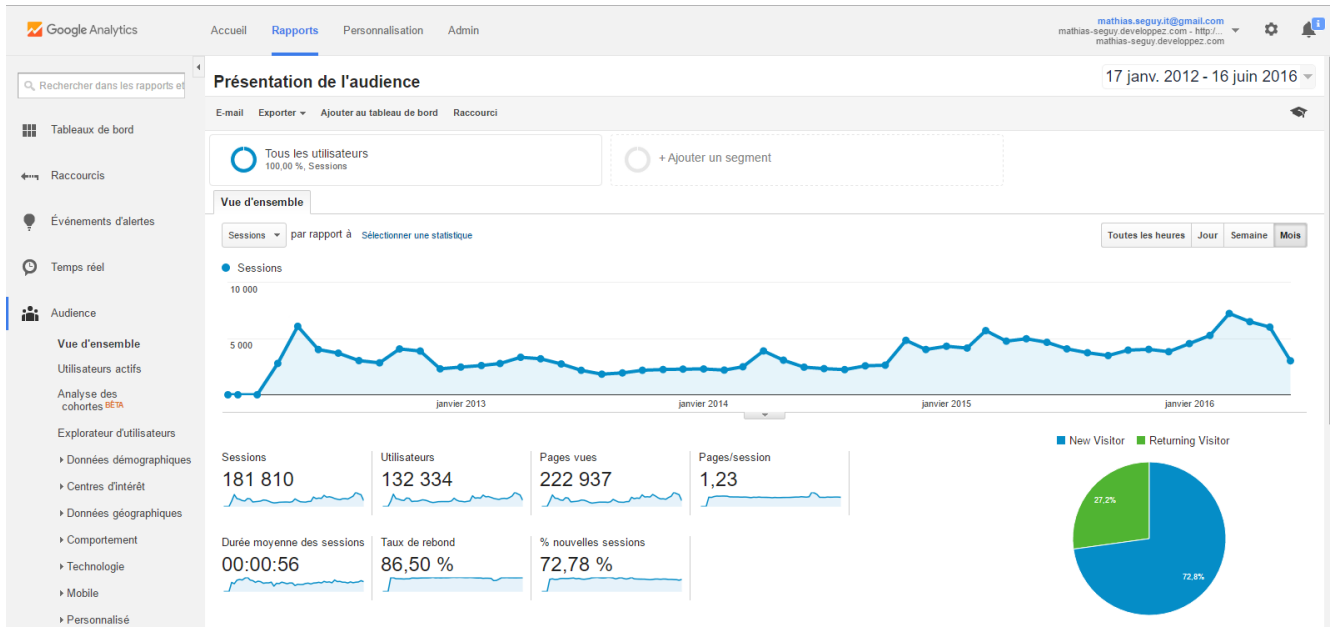

ARTICLES ON DEVELOPPEZ.COM

I also wrote articles on developpez.com (a French website on development).

We can sum up:

- **132 334 Users**
- **181 810 Session**
- **222 937 page views**

The google analytics screen shoots that show that:

During the time, URL changed, this is why you have different urls when calculating the audience.
The most read articles are listed below:

Apprendre à utiliser la ToolBar

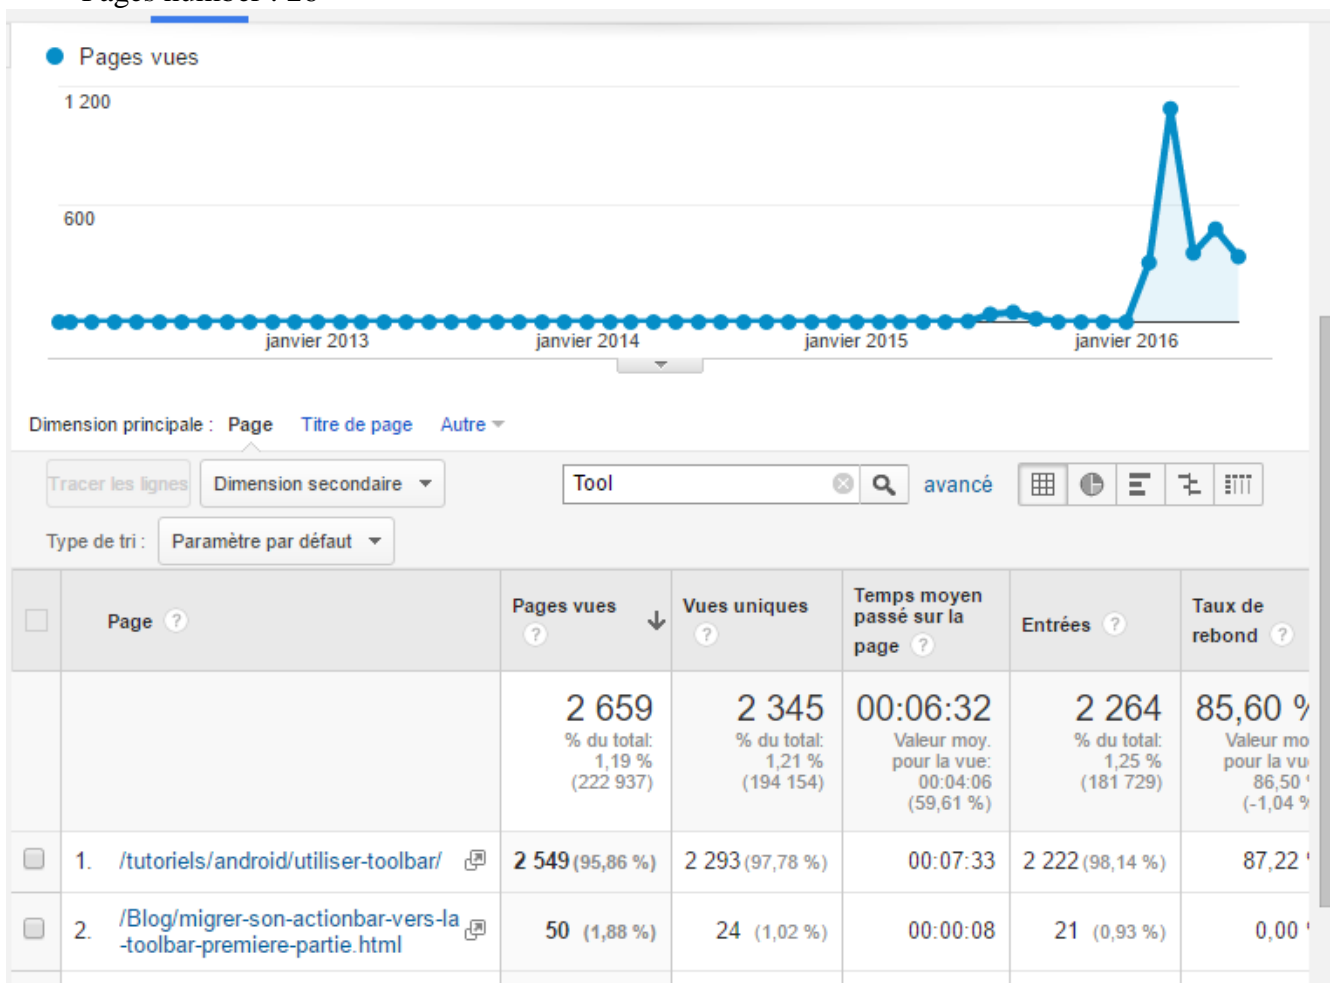

<http://mathias-seguy.developpez.com/tutoriels/android/utiliser-toolbar/>

Publication Date: 29 février 2016

Resume: Explains how to migrate from ActionBar to ToolBar and also have a deep look at the ToolBar itself.

Audience: 2293 unique views

Pages number : 26

Retrofit, OkHttp, Okio, Moshi

<http://mathias-seguy.developpez.com/tutoriels/android/utiliser-retrofit/>

Publication Date: 27 juin 2016

Resume: Explains in a deep way how to use Retrofit, OkHttp, OkIo and Moshi.

Audience: 0 because not release yet :) but I hope a hit :)

Pages number : 50

GOOGLE PLAY

It's not my strenght. I have several applications on GooglePlay but it's just tutorials that I drop there sometimes. I never built a real application, I wrote thousands of tutorials.

I recently search how to delete them from the store (not possible) so next time I build them I will drop their MaxSdk to 7 :)

TOUTES LES APPLICATIONS

+ Ajouter une nouvelle ap

Filtrer ▼							Pa
NOM DE L'APPLICATION	PRIX	INSTALLATIONS ACTUELLES/TOTAL ?	NOTE MOY. / NOMBRE TOTAL	PLANTAGES ET ANR ?	DERNIÈRE MISE À JOUR	ÉTAT	
La météo par AndroidZEE 1.5	Gratuite	14 / 138	★ 4.00 / 4	—	1 avr. 2016	Publiée	
My Google Public Profile 1.0.2	Gratuite	185 / 2 112	★ 4.11 / 36	1	15 nov. 2013	Publiée	
MyLight 2.0	Gratuite	581 / 7 120	★ 4.26 / 46	—	3 mai 2013	Publiée	
MySensors 1.0	Gratuite	350 / 4 097	★ 4.52 / 23	—	7 mai 2012	Publiée	
MyTorch 2.0.1	Gratuite	146 / 2 347	★ 3.84 / 19	—	30 août 2013	Publiée	Pa

The only applications that really works are *MyLight*, *MySensors* and *MyGooglePublicProfile*.

I need to work again on :

La météo because Yahoo stop its Forecast rest service 2 months after I have finished the application.
So I am currently writing a new one.

I will "delete":

MyTorch doesn't work on all device and I will remove it from GooglePlay because it's too much work to make it work on every devices.

OTHER
